# Argentina

Stretching along the western edge and across the southern half of the South American continent, Argentina has a diversity of landscapes ranging from jungle to the remote tip of Patagonia. In between, one can immerse in the city lights and tango sounds of cosmopolitan centers like Buenos Aires, some of the most exclusive wine estates in the world in Mendoza, or the spectacular outdoor activities promised by the treks of El Chaltén or the glaciers of El Calafate.

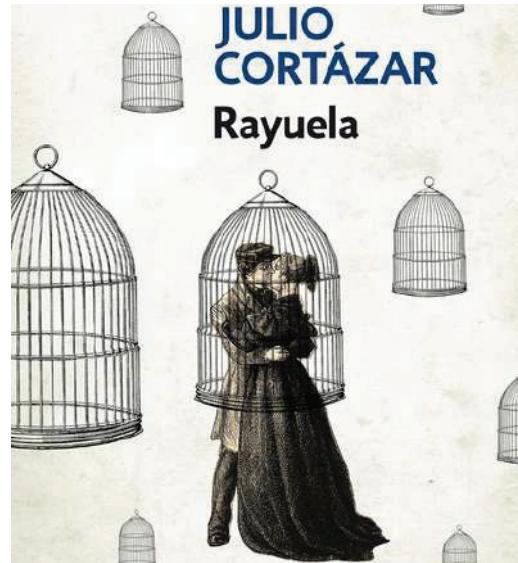

Somewhat geographically disconnected from the rest of the continent and owing to its unique migratory patterns, Argentina has developed a culture very much its own. There's a distinctly European, Old World feel to so much of its food, its art, its music, and its architecture. A truly luxurious destination, Argentina is a place you won't soon forget.

## BOOKS

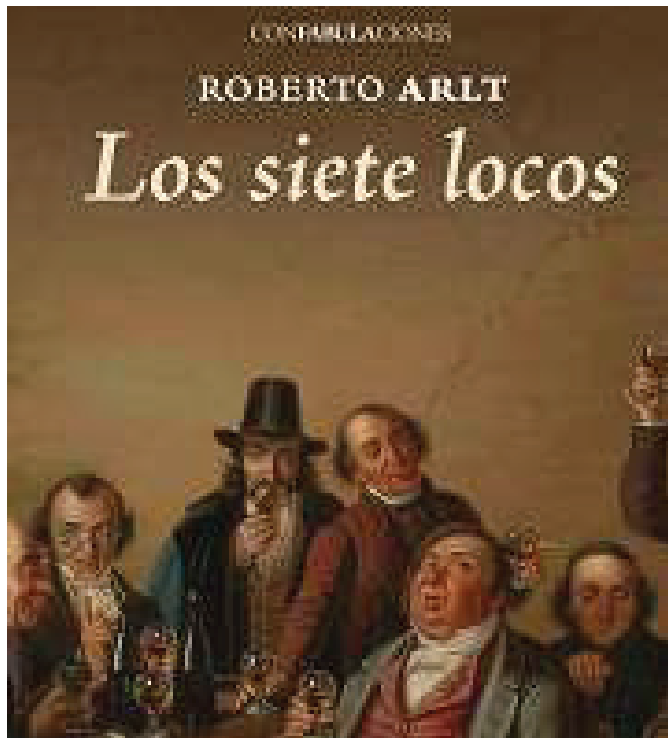

### *Hopscotch by Julio Cortázar*

Julio Cortázar was one of the founders of the Latin American Boom and considered among the most innovative and original authors of his time. Hopscotch is a stream-of-consciousness novel with multiple endings, and it was Cortázar's masterpiece. Intended as a reflection on the lifelong search for truth, the story is told through the adventures of Horacio Oliveira, an Argentinian writer who lives in Paris with his mistress and bohemian friends before a tragic death leads him back to Argentina.

### *The Seven Madmen by Roberto Arlt*

When Remo Erdosain is caught embezzling money from his employer, he loses his job, his wife leaves him, and he finds himself wandering the frenzied streets of 1920's Buenos Aires questioning the integrity of his mind and soul. Eventually finding himself among a group of revolutionaries, this portrait of Buenos Aires at a time when it was thought to be destined for greatness prophesizes the cycle of conflict that would haunt Argentina throughout the 20th century.

### *The Aleph by Jorge Luis Borges*

The Aleph is a point in space from which all other points in the universe can be seen. A concept imagined and brought to life by Jorge Luis Borges, The Aleph is a method for exploring infinity and arguing that experience shapes perceptions, time is inescapable, and the universe is indefinable. Published in 1945, this short story is thought to be Borges' magnum opus.

## MOVIES

### *The Secret in Their Eyes (2009)*

Based on the novel *The Question in Their Eyes* by Eduardo Sacheri, this film depicts a legal counsellor and his boss as they investigate a rape and murder case while also following their lives 25 years later, with the case as unresolved as the romance between the two. Winner of the Award for Best Foreign Film at the 82nd Academy Awards and the second highest-grossing film in Argentine history at the time of its release, *The Secret in Their Eyes* was recently ranked No. 91 on the BBC's 100 Greatest Films of the 21st Century.

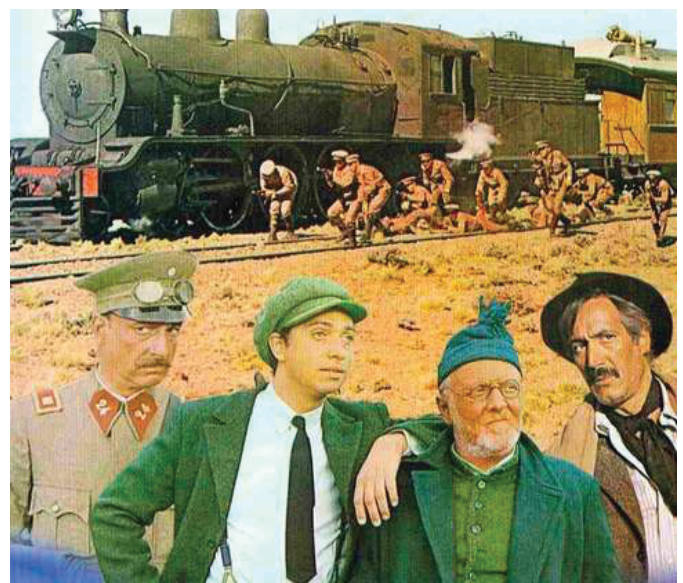

### *A Place in the World (1992)*

In remote Argentina, Mario, his wife Ana, and a geologist named Hans, fight to stop the building of a dam that will flood their valley and end the livelihoods of many locals. Set at a time when Argentina was returning to democracy, the strong cast of characters passionately argue about politics, human rights, and religion. Winner of numerous international and national awards, *A Place in the World* is a coming-of-age story that was also nominated for the Academy Award for Best International Feature Film.

### *Rebellion in Patagonia (1974)*

One of the best Argentinian films of all time, *Rebellion in Patagonia* is based on Osvaldo Bayer's renowned novel *The Avengers of Tragic Patagonia*. It portrays the military suppression of anarchist and socialist workers in the Santa Cruz province of Patagonia in the 1920s, who made a strike to demand better working conditions.

## *Buenos Aires*

Altitude: 25 m (82 ft)

Buenos Aires is Argentina's capital, and it's a place where a cultural passion for food, wine, art, and music fills the city streets late into the night. # RESTAURANTS

## Chila

CHILA is where the fine dining expertise of restaurateur Andrés Porcel meets the culinary talent of Executive Chef Pedro Bargeró. It's where lighting, music, and silverware are considered as important as the textures, tastes, colors, and perfumes of each dish. A truly avant-garde encounter for all of your senses, CHILA can take something as ordinary as a leek and turn it into a work of art. Except for staples like the Patagonian toothfish, the menu here is dynamic and ever-changing. Indulge in the 8-course tasting menu for a well-rounded experience of CHILA's very essence.

## El Baqueano

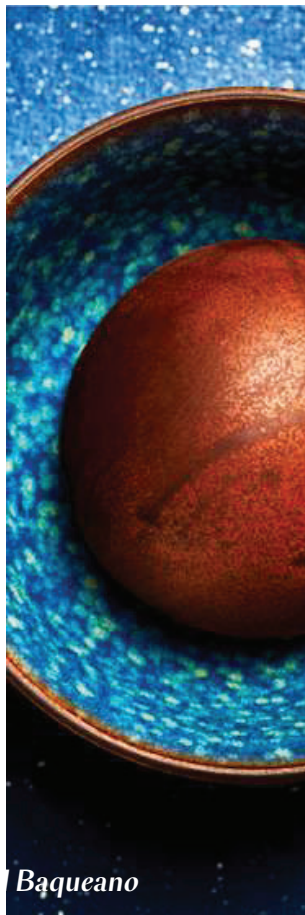

Much of the cuisine that Argentina is known for descends from the many waves of migrants who landed here over the centuries, but El Baqueano is a celebration of Argentina's indigeneity. Specialists in autochthonous cuisine, they serve native and alternative meats from small producers and fishermen from the 18 ecoregions of Argentina. From ñandú, alligator, llama, and vizcacha to cayote fruit, araucaria pine nuts, and the edible wood of yacaratiá, their ability to combine exotic ingredients with innovative style are unequaled.

## Don Julio

Meat and wine are the foundations on which Argentinian cuisine is built, and Don Julio's is the cathedral of both. Grill master Pepe Sotelo keeps masterful watch over the open-fire parrilla, sending plate after plate of juicy, flavorful, and expertly prepared cuts to packed tables. While every steak they serve is a textbook example of Argentine cuisine and culture, the skirt steak (entraña) is the off-menu choice of local diners.

While that entrance transports you through time, exquisite cocktails spun up by the legendary mixologist, Renato Giovannoni, reassure you that you're in one of the trendiest places on earth. Signature drinks once took inspiration from the stories of Old World migrants, but their most recent project is inspired by indigenous and rural communities and uses autochthonous ingredients. It seems whatever Giovannoni does is well-received because Florería Atlántico has managed a spot on the World's 50 Best Bars list year after year.

## RESTAURANTS

### *El Parador* 🥕 🌿

With only 5 tables for two, El Parador is a small restaurant where everything else is huge: the portions, the flavors, and the excitement and energy of their staff. Their deceptively simple Argentinian dishes like pies, empanadas, and stews are overwhelmingly succulent and hearty. For something comforting and warm, try the lentil stew filled with chorizo, smoked bacon, and other meats.

### *Parrilla La Oveja Negra* 🌾

Often attended by the owner and always filled with the mouthwatering smell of grilling meat and barbecue, this traditional parrilla is where you fill up after long days of exploration. The lamb is a top seller and frequently sells out, but you should start with the provoleta, an Argentine pulled-curd provolone described by guests as one of the best they've tried on their visit.

## *Aconcagua*

Altitude: 6,961 m (22,840 ft)

This small town is where you'll stay when visiting the highest mountain on the American continent, from which the town derives its name. At nearly 7,000 meters, it's a dream of many climbers to reach the summit and, for others, it's a heavenly place for panoramic mountain views and a taste of mountain life in the heart of the Andes.

## RESTAURANTS

### *La Caballeriza*

In a restored wood and stone home from the 1950s, La Posada has created the most charming mountain atmosphere for its guests. In the space where the Gendarmerie Stable was located, they've installed a traditional a la carte restaurant with a view of the glacier of Cerro Tolosa. This is a snug and familiar spot to fill up on parrilla, pasta, and homemade snacks, alongside a wide variety of wines and locally-brewed beer.
